

FlexCabling

TV and Radio Balun

Description

In both FlexCabling "TV and Radio Splitter" and "TV and Radio Cable", the TV and Radio Balun are installed, to make perfect impedans matching between unbalanced 75 ohm systems (Coax) and balanced 100 ohm systems (Ethernet).

FlexCabling only use high quality baluns, from world leading manufacturers, to reach the best performance.

Product Type: TVR Balun

Installed in a FlexCabling TV and Radio Splitter.

Input: 75 ohm unbalanced F-Type (coax)
Output: 100 ohm balanced RJ45 STP

Installed in a FlexCabling TV and Radio Cable.

Input: 100 ohm balanced RJ45 STP
Output: 75 ohm unbalanced IEC male (coax)

Frequency range: 5-862 MHz
Also support return path signals
